

AI-Generated Content Disclosure — Terms of Service

Clause for insertion into OLYA's Terms of Service / end-user agreement · Draft for legal review · 29 May 2026

How to use. Insert the numbered clauses below into OLYA's Terms of Service or end-user agreement (suggested heading: "AI-Generated Content"). A short plain-language notice for the product UI is provided at the end.

AI-Generated Content

- 1. AI generation.** Content created through the OLYA service ("Output") is generated by artificial intelligence systems, including third-party general-purpose AI models. Output is produced automatically by software and is not written, reviewed or verified by a human unless we expressly state otherwise.
- 2. Interacting with AI.** Where you interact with a conversational or automated feature of the service, you are interacting with an AI system and not with a human.
- 3. Marking of AI content.** Where technically feasible, OLYA marks Output in a machine-readable format to indicate that it has been artificially generated, consistent with Article 50 of the EU AI Act. You agree not to remove, alter or obscure any such marking, watermark or disclosure.
- 4. Accuracy and no reliance.** AI-generated Output may be inaccurate, incomplete, out of date or misleading, and may not reflect real people, events or facts. Output is provided "as is" for your evaluation. You are responsible for reviewing and verifying Output before relying on, sharing or publishing it.
- 5. Not professional advice.** Output does not constitute legal, medical, financial or other professional advice and should not be used as a substitute for a qualified professional.
- 6. Your disclosure obligations.** If you publish or distribute Output — in particular content that constitutes a deep fake, or text published to inform the public on matters of public interest — you are responsible for disclosing that it was artificially generated or manipulated, where required by Article 50 of the EU AI Act or other applicable law.
- 7. Acceptable use.** You must not use the service or Output to create unlawful content, including non-consensual intimate imagery or any child sexual abuse material, or to deceive others as to the human or authentic origin of content.
- 8. Ownership.** [Set out ownership of Output and any licence between OLYA and the user, consistent with OLYA's commercial model and the rights granted by its AI providers.]
- 9. Changes.** We may update these terms as the service and applicable AI regulation evolve. Continued use after an update constitutes acceptance of the revised terms.

Plain-language notice (for the product UI)

This content is generated by AI and may contain errors or inaccuracies. Please review it before you use or share it.

Timing note. The provider obligation to mark AI output in a machine-readable form (Article 50(2)) applies from 2 August 2026; under the provisional Digital Omnibus agreement (6 May 2026) this marking obligation is expected to

be postponed to 2 December 2026. The human-facing disclosures above can and should be in place regardless. Confirm final dates against the consolidated text.

Disclaimer. This is a template prepared to support OLYA's EU AI Act compliance work. It is provided for internal discussion and does not constitute legal advice. AI Act implementation is still evolving — including changes under the 2025–2026 “Digital Omnibus” (provisional agreement reached 6 May 2026) — so dates and obligations should be confirmed against the final consolidated text. Bracketed items are placeholders. Have qualified EU counsel review and adapt before use.
